

# OFFICE SEATING RANGE

Made to the same exacting standards as our well known driver seats, we can manufacture a custom specification seat for your office or home. Using an Italian designer high-quality office seat mechanism we are able to put together a highly durable and serviceable customised office seat!

Available in a range of styles, the seats can be fitted with various options and trimmed in a variety of material and patterns to suit all tastes and environments.

All seats trimmed in leather or E-leather® are also fitted with Outlast® to help regulate the temperature and can also be specified with ProBax® cushion technology to improve posture.

We can also have embroidery added to the seat to give it that extra touch of personalisation!
